

CGM Technologies
Wendy Brown, PharmD, PA-C

At this roundtable, we will explore continuous glucose monitor (CGM) technologies, catering to both novice and expert participants. We will examine the most utilized CGM technologies, discuss personalized selection and troubleshooting strategies, and analyze key components of CGM reports to optimize diabetes management. By delving into device features, individualized approaches, and data interpretation, attendees will leave equipped with invaluable knowledge to enhance patient care and outcomes in diabetes management.
