

Burning Down the Barriers to Patient Care - North Dakota Pharmacy Convention

Mark Hardy, PharmD

The Board of Pharmacy has worked hard to modify rules and implement laws for pharmacy professionals to take advantage of in their practice. These opportunities are driven by the professional who desires to impact patients at the highest level. We will have an open discussion about these changes and models from around the state that highlight the utility of these advancements in practice.

Some of the advancement in laws and rules that may be highlighted include the following:

- Pharmacist Prescriptive Authorities
- 30 day emergency refill authority
- Administration of medications beyond immunizations
- Technicians providing administration of medications
- CLIA Waived tests – including Technician delegation
- Collaborative Practice Agreements

We will encourage an open dialogue along with requesting thoughtful approaches to further advancements which the Board can consider.
