

CGM Care Model:

Can it work in a community setting?

Shane Wendel, PharmD

Joy Dahlen, PharmD Student

1. Discuss what is needed to develop a care model.
 - Establish a baseline of space, privacy, and equipment.
 - Collaborate agreements with providers or create contracts with payers.
 - Workflow, scheduling, and follow-up patient care
 - Measuring and tracking results – teaching patients how to manage themselves better.
2. Discuss a business model that works and is sustainable.
 - Don't work for free.
 - Combining existing services with CGM management
 - Thinking outside the box
3. Open discussion
 - What current models exist in Community Pharmacy?
 - What are options for workflow are available?
 - How are we getting paid?
4. Questions
